HARROLD'S PANSY GARDENS & GREENHOUSES

P. O. BOX 29 — GRANTS PASS, OREGON.

SPRING PLANTING

This is our usual New Year edition of this publication and will be found to carry items of prime interest at this time. PANSY AND VIOLA SEEDS may now be planted to grow good bedding plants for April and May sale. In PANSY PLANTS we still have a good supply of those varieties listed but we don't expect it to be sufficient to meet all demands later in the spring. PERENNIAL PLANT stocks are in but in moderate supply and should be ordered as early as possible. GLADIOLUS BULES are at present in fair supply in the varieties and sizes offered but the picture here can change rapidly due to carload shipments usually made in January and February. Order these AT ONCE. TUBEROUS BEGONIAS: Order seeds AT ONCE. Supply is now good and its time to plant. On tubers we offer the AMERICAN STRAINS (SUPERIOR) but no more will be available until about February First when the California grown crop is available.

BARGAINS IN SPRING FLOWER SEEDS

About a month ago we mailed you a copy of our list of these issued under the re-organized department being set up to supply the highest quality, standard varieties to you. We hope that you took a few moments and read this "Harrold's Seed Brokerage List" carefully. If not look it up and see the saving we can offer you in the most popular of the spring planted flower seeds. We mentioned re-organization of this department. It was virtually dropped during the war years because of supply and labor conditions. Now that we are re-entering this field we are doing so on an entirely new basis with the most attractive prices; the best seed quality and a new quantity system that will be really helpful to you. Insure your copy of this special list in the future by asking to be placed on this special mailing list.

Harrold's Pedigreed Strain

Pansy Plants

These plants are September planted in open field beds and are from sandy loam soil so that they are well developed with nice roots. Normally we supply the largest grade available which is best for early bedding and in some cases may be showing some buds. Where stock is desired for transplanting in flats for spring sale we are glad to supply a smaller size that is suitable so long as we know that is the purpose in mind. Unless this information is given, however, we will ship the larger grade. Prices are the same for either.

Unusual Pansies

HARROLD'S EXCLUSIVELY BRED NOVELTIES AND SPECIALTY VARIETIES

VARIETY Price per 100 500

C. W. HARROLD'S PRIVATE BLEND: This is our NEWEST 1949-1950 novelty. Seed harvest has been better than expected earlier and we are able to offer a modest supply of these plants now. For typical coloring see color plate on the July 20th edition of this publication. Colors and combinations in this mixture exceed 800 all different. Flowers, while not as large as our Harrold's Pedigreed Giant Art-Shades are of heavy texture and ruffled and fluted. Coloring is extensive in orchid and pastel shades with many polychrome combinations of metallic sheen. Does not sunburn badly as so many light shaded sorts do and there is practically no trace of albino characteristics. The Pansy of the next ten years perfected for you now.

Delivered prepaid by Parcel Post. \$4.00 \$16.00

SPECIAL: By the thousand Express Collect \$25.00.
Not less than 1,000 units sold.

HARROLD'S PEDIGREED NOVELTIES: Surplus from our breeding work. Many unusual types and colors.
Delivered prepaid by Parcel Post. 4.00 16.00

HARROLD'S PEDIGREED POT PANSIES: This is a dwarf growing type that is best suited for growing in window and porch boxes, large pots or tubs or anywhere that a dwarf compact plant is desired. The flowers are large and color range as varied as our Harrold's Pedigreed Giant Art-Shades.
Delivered prepaid by Parcel Post. 3.50 14.00

HARROLD'S PEDIGREED CUT-FLOWER PANSIES: Original type. This is the shorter growing type of our two strains of this special purpose stock. Does well under glass or for outdoor cut-flowers producing longer stems than average bedding type stock. Flowers are large and color range is most varied.
Delivered prepaid by Parcel Post. 3.50 14.00

The prices on this group include shipping charges in U. S. A.

Quantity Prices on Pansy Plants

QUANTITY RULES ON PANSY PLANTS

Any item for less than 250 of a variety will be invoiced at the 100 rate. Two hundred fifty or more of a variety will be supplied at the 1,000 rate. Not less than

3,000 will be supplied at the quantity rate and then not less than 1,000 of a variety may be included in this quantity quotation. The shipping weight of plants varies a great deal with the varying size of plants at shipping time and the moisture of the soil at the time stock is dug. For that reason it is difficult to give a fixed shipping weight or to quote a uniform and definite prepaid price. **PLEASE EXAMINE OUR NEW PREPAID SCHEDULE WHEN ORDERING.**

All our plants are wrapped in bundles of 10, 25 and 50 depending on size of stock. Wrapping is done in new, special paper wrappers with the roots protected by moist sphagnum moss. Packing is in especially adapted fiber-board cartons, ventilated for safe delivery. Our shipping methods have been proven by use during the past 40 years and good delivery is possible to any part of the U. S. A.

WE DO NOT SUPPLY ANY STOCK IN FLATS.

PARCEL POST DELIVERY AT ACTUAL COST.

Under the following formula you **PAY ONLY THE ACTUAL POSTAGE COST TO YOUR INDIVIDUAL POSTOFFICE.**

When ordering material offered on a prepaid basis remit the prepaid price in full. We will then make shipment invoicing the merchandise to you at the **COLLECT PRICE.** We will pay the exact postage plus insurance fee necessary to deliver the shipment to you. When we mail you the invoice **WE WILL REFUND ANY DIFFERENCE BETWEEN ACTUAL POSTAGE AND ALLOWANCE MADE** back to you with the invoice. The differential in price for the two different services is based on what has proven to be average shipping weight and maximum distance of shipment. In a few cases at extreme distance we might have to bill you for a few cents. Conversely those customers living close by will receive refunds proportionately greater in adjusted transport costs. Actually the ratio will work out roughly that customers over 1400 miles distant will pay 60 to 110% of transport differential; 600 to 1400 miles 45 to 70%; 150 to 600 miles approximately 20 to 40%. The overall saving as compared to Express shipment will average about 40%. The selection, however, is up to you.

NOTICE: We will not prepay postage in any case except on the terms set forth above. Where these conditions are not fully met shipment will be by **Express Collect ONLY.**

Pansy Seeds

PLANT NOW FOR SPRING PLANTS

Pansy seeds may be planted in flats, indoors, up to February 20th and still produce nice plants for late April and May sale. They may be shifted into cold-frames quite early as they stand a good deal of frost without damage and so take a minimum of valuable greenhouse room once they are well started.

IMPORTED PANSY SEED

These imported varieties are the best from the foremost European growers. They afford variety in color and different markings making them desirable but generally the flower size is not as large as American varieties. Prices, however, are much lower than is possible with our labor costs in this country. Their greatest appeal is where certain types are desired for special use or on their low price.

Hardy Primroses

Primula Polyanthus-Veris Hybrids

HARROLD'S PEDIGREED GIANTS

Developed in our breeding department after many years of intensive work we believe this to be the finest in this type. The plants are pleasingly compact but of robust growth, usually from 8 to 10 inches high under good culture. Flower stems are 12 to 16 inches with flowers well above the foliage. The flower heads, composed of many florets which are often individually larger than a silver dollar, are often 8 inches or more across. Coloring is the most brilliant of any strain available in this type. While available in mixed colors only, the blend contains yellow, red, purple and white in the more common shades plus pink, flame and bronze shades in pastel and poly-chrome combinations that are rare. A few blue shades are in the mixture. Marking of the flowers is just as outstanding with selfs blotched and laced markings in the flowers.

FRESH TESTED SEEDS

Price per Trade Packet about 300 seeds \$1.00; 3 for \$2.50; ¼ oz., about 1500 seeds, \$4.00; ½ oz., \$7.50; ¾ oz., \$14.00; 1 oz., \$25.00; 2 oz., \$50.00. Planted indoors now these can be transplanted outside for sale next fall and will bloom well next spring.

PLANTS OF BLOOMING AGE

FROM 1947 and '48 plantings. Transferred now these will give good color showing this spring. **PRICE** - Delivered Postpaid by Parcel Post: 10 for \$3.00; 25 for \$5.00; 50 for \$9.75; 100 for \$18.50. By Express collect: 1,000 for \$130.00. 250 supplied at the 1,000 rate.

Southern Oregon Grown GLADIOLUS BULBS

This unusually fine selection of Gladiolus Bulbs offered here is outstanding in variety selection. We offer many of the newer sorts which are just coming into heavy commercial use while the whole list is composed of the very finest commercials of late development. Practically all of the old sorts have been replaced by varieties that have improved color, growing habit or are much more disease free than those sorts they have replaced. We have fully followed the long established Harrold policy of offering only **THE BEST** in class and type.

PRICES ARE MUCH LOWER THIS YEAR: A comparison of the prices offered here with our list at this time last year will show an average drop of 35 and 40%.

Filling your requirements as early as possible is to be recommended. A few varieties have already been exhausted and dropped in this present list that we had been able to offer earlier. We must of course make all offers subject to availability when order is received. Sometimes we can supply the next size larger or smaller than the one ordered and we will fill orders in this manner unless you specify when ordering that this will not be acceptable. Orders will be shipped in rotation of arrival as rapidly as possible now.

These prices by the 1,000 will apply to all orders for an item of 250 or more of a variety and size. Not less than 50 bulbs of a variety and size will be sold from this list and where quantity is less than 250 of an item the 100 price will apply. To find the 100 price divide the above 1,000 price by ten and add 10%.

SOME INTERESTING NOVELTIES

This is a group of new sorts that you will find of much interest if you are experimentally inclined. These our growers have picked as coming commercials that are most apt to be the cream of the new commercial list in a couple or three years. Stocks are limited so early ordering is recommended.

TUBEROUS BEGONIA SEEDS

It is now time to order these seeds for seedling plants to be bedded out after danger of frost is past in the spring. Plants suitable for outdoor setting will take about 18 weeks to develop if culture is reasonably good. As we go to press the Fanciers mixture is available in good supply and the separate colors are expected to be very soon, probably by the time you receive this list.

The plants are usually transplanted twice and set out doors after danger of frost is past, when they are about 5 to 8 inches high. Normally such plants will start blooming by August and continue until frost. Seedling plants are of course later to bloom than those grown from tubers. You may grow tubers for next year planting from these seeds planted this season.

The seeds are extremely fine and require careful attention to their culture. This requirement is fully covered in detail by our 17 page cultural booklet that accompanies each shipment. Pleasing results can be obtained with a little care.

HARROLD'S FANCIERS MIXTURE

This is a general mixture of seeds from our very large collection. This collection consists of over a hundred different types and colors and will afford attractive sales plants next spring if planted early enough to bloom the plants by selling time from April through June. These are of course all hand pollinated and many select crosses have been made to produce this seed. We believe this to be valuable stock for any grower and especially for those just entering this culture and the smaller grower-retailer. **SEEDS:** Our packets contain in excess of 500 seeds. With reasonable culture and success you should produce more than 250 plants to the packet. **PRICE** is \$2.50 per packet; 3 pkts., \$5.00; 10 pkts., \$15.00; 25 pkts., \$30.00.

SEPARATE TYPES

CRISPA SINGLE FRILLED: In mixed colors only.

PRICE: Per pkt., about 500 seeds, \$2.50; 3 for \$6.00; 10 for \$18.00, assorted or selected.

Hardy Carnations

This group has been extremely popular with our trade for many years and we offer here a most complete line of this Hardy Boarder group.

They will be found to be well adapted to outdoors growing, much more so than the American Type Florist Carnations grown indoors by florists.

They differ from the Greenhouse carnation in that the plant habit is hardier making them more satisfactory as an outdoor subject and while the flowers are somewhat smaller they are pleasingly spice scented. These are subject to some variability in doubleness in differing environment therefore are not expected to be 100% double when grown in varying conditions. They are Garden Carnations, not Garden Pinks.

Begonia Tubers

Early crop, greenhouse grown tubers have now all been sold so that for the rest of the season we will supply only outdoor grown stock. Harvest is under way at the California ranch and stock will probably be available for shipment from these plantings as usual about the end of January. Shipping will continue until sold or usually into April. Compared with imported tubers the American stock has had a longer, more natural growing season, giving a more naturally developed tuber. The strain quality is undoubtedly more uniform.

In this stock we offer but one grade — random crop run above 1 1/4 inches in diameter. They will bloom if properly cultured as they have bloomed in the production fields. Early ordering is suggested as the supply is always less than the demand for the American Bred strains.

The planters we offer here are produced from late sown seed and will range from 1/2 to 1 inch diameter. Planted early they will develop plants for spring bedding sale that show more bloom and are larger than the seedlings you can produce this season. Because more of them can be had in bloom by selling time next April and May they are well worth the small increase in cost and you save yourself the tedious seeding and transplanting required when growing from seed.

COMMERCIAL TUBERS

EXOTIC MIXTURE: This group consists of varieties commonly considered as "types". No other plant produces as many different flower forms resembling other unrelated flowers as do these Begonias and they are commonly called the "Mocking Bird" of the flower world. The wide variety of types found in this mixture resemble Narcissus, rosebuds, camellias, carnations, ruffled petunias, peonies, poppies and about 20% are pendula Lloydii or hanging basket type of pendent form. About 20% of the mixture will be from hybrids still under development. For something different to sell your customers THIS IS IT. We retail these tubers at \$5.00 per dozen. WHOLESALE PRICE: 25 for \$5.00; 50 for \$9.00; 100 for \$17.50 postpaid.

POPULAR MIXTURE: This mixture carries a wide range of colors mostly in the Camellia Double, Carnation Double and Crispa Single Fringed. The ratio is balanced to meet about average retail sales both in types and colors. For novelty we can on request add up to 15% unclassified hybrids from our breeding work. We retail these same tubers at \$2.50 a dozen and plants at from 60¢ to \$1.00 each. WHOLESALE PRICE OF THESE TUBERS: 25 for \$4.00; 50 for \$7.50; 100 for \$12.50 postpaid.
